Closest locations 1-7, Table 1 of 33

Data Note: Locations are listed based on their proximity to the study area location. A maximum of 5000 records can be displayed on one report. Data on the Business Locator report is based on the businesses whose location falls within the area of study. Total Sales, Total Number of Businesses, and the Employee/Population Ratio are calculated using the collection of business points that fall within the area of study. Estimated employee counts and sales volumes are provided by Data Axle.

 **Source:** Esri forecasts for 2026 and 2031. Business information provided by Data Axle (April 2026). Data Axle assigns two additional proprietary digits onto standard NAICS and SIC classification codes to provide more detail about the business type.

Closest locations 1-7, Table 1 of 168

Data Note: Locations are listed based on their proximity to the study area location. A maximum of 5000 records can be displayed on one report. Data on the Business Locator report is based on the businesses whose location falls within the area of study. Total Sales, Total Number of Businesses, and the Employee/Population Ratio are calculated using the collection of business points that fall within the area of study. Estimated employee counts and sales volumes are provided by Data Axle.

 **Source:** Esri forecasts for 2026 and 2031. Business information provided by Data Axle (April 2026). Data Axle assigns two additional proprietary digits onto standard NAICS and SIC classification codes to provide more detail about the business type.

Closest locations 1-7, Table 1 of 295

Data Note: Locations are listed based on their proximity to the study area location. A maximum of 5000 records can be displayed on one report. Data on the Business Locator report is based on the businesses whose location falls within the area of study. Total Sales, Total Number of Businesses, and the Employee/Population Ratio are calculated using the collection of business points that fall within the area of study. Estimated employee counts and sales volumes are provided by Data Axle.

 **Source:** Esri forecasts for 2026 and 2031. Business information provided by Data Axle (April 2026). Data Axle assigns two additional proprietary digits onto standard NAICS and SIC classification codes to provide more detail about the business type.

Closest locations 1-28, Table 1 of 2

Data Note: The Traffic Profile displays up to 30 of the closest available traffic counts within the largest radius around your site. The years of the counts in the database range from 2025 to 2000. Esri removes counts that are older than 2000 from the Kalibrate provided database. Traffic counts are identified by the street on which they were recorded, along with the distance and direction to the closest cross-street. Distances displayed as 0.00 miles (due to rounding), are closest to the site. A traffic count is defined as the two-way Average Daily Traffic (ADT) that passes that location.

Closest locations 1-28, Table 1 of 2

Data Note: The Traffic Profile displays up to 30 of the closest available traffic counts within the largest radius around your site. The years of the counts in the database range from 2025 to 2000. Esri removes counts that are older than 2000 from the Kalibrate provided database. Traffic counts are identified by the street on which they were recorded, along with the distance and direction to the closest cross-street. Distances displayed as 0.00 miles (due to rounding), are closest to the site. A traffic count is defined as the two-way Average Daily Traffic (ADT) that passes that location.

Dist (mi)	Street	Nearest Cross Steet	Year of Count	Traffic Count
0.80	Highmeadows Village Dr	Ravine Rd	2002	320
